2. Search “**Call of Duty Warzone**”.
3. Select the game and hit **Get** (free).
4. Allow it to install in the background.

Xbox players do not need Xbox Game Pass Core to play Warzone.

6. Warzone Download Size (2025 Estimate)

Call of Duty Warzone is known for its large file sizes, especially after seasonal content updates. While sizes change, here’s the approximate breakdown for US players in 2025:

- **PC (Battle.net):** 65–120 GB
- **PS4 / PS5:** 80–110 GB
- **Xbox Series X|S:** 80–115 GB

Make sure you have at least 20 GB extra space for updates.

7. System Requirements for PC

Here are the recommended specs to run Warzone smoothly:

Minimum:

- CPU: Intel i5 2500K or AMD equivalent
- GPU: NVIDIA GTX 970 / GTX 1650
- RAM: 8 GB
- Storage: 120 GB free space
- OS: Windows 10 64-bit

Recommended (Best for 1080p/120FPS):

- CPU: Intel i7 or Ryzen 7
- GPU: NVIDIA RTX 2060 / 3060 or better
- RAM: 16 GB
- SSD recommended for faster load times

Warzone is well-optimized but really benefits from modern hardware.

8. Why Warzone Remains Popular in the USA

Call of Duty Warzone has dominated the US gaming scene since launch thanks to its blend of tactical realism and fast-paced battle royale gameplay. American players enjoy the constant seasonal events, rotating modes, competitive ranked lobbies, and heavy social presence on Twitch and YouTube. With crossplay enabled, friends on every system can team up easily, making it a go-to game for weekend squads.

9. Tips to Speed Up Your Warzone Download

If your Call of Duty Warzone download feels slow, try these quick fixes:

- Use a **wired Ethernet connection** instead of Wi-Fi.
- Close background apps like Chrome or Steam.
- Pause and resume the download to refresh speeds.
- Choose a server region close to your location (USA East/West).
- Allow your console to stay in **Rest Mode** for faster downloads.

These small tweaks often cut download times by 30–40%.
